## **Long Long Road**

Red sun comes rising out of the  
sea

On the long long road  
And the bones of the ocean  
This land under me  
On the long long road

Up the St. Lawrence  
To the queen of the Lakes  
On the long long road  
And the waves of the water  
They endlessly break  
On the long long road

On the long long road  
On the long long road  
The waves on the water  
They endlessly break  
On the long long road

The prairies a straight line  
Beginning and end  
On the long long road  
And the mile posts marking  
The time that we spend  
On the long long road

West to the mountains  
That greyness of stone  
On the long long road  
And the setting sun sinking  
Tired to the bone  
On the long long road
