

## All Lights Burning Bright

(Words and Music: David Francey SOCAN 2007)

We were standing the last watch  
At the close of the day  
Three days on the water  
Out from Thunder Bay

'cross Superior, Huron  
And into St. Clair  
On a bright day in summer  
I found myself there

Dead calm on the water  
As blue as the sky  
And we waved from the water  
As we slowly passed by

We entered Lake Erie  
It was late in the day  
You could see that storm coming  
From a mile away

We had all lights burning bright  
All lights burning bright  
All lights burning bright  
All lights burning bright

The storm over took us  
It fell like the night  
And the point and the island  
They passed out of sight

But we sailed on rock steady  
Set course through the storm  
As the sky fell around us  
And the wind drove us on

And I thought to myself  
I'd be just like this ship  
If I kept my light burning  
On every trip

The watch it was ended  
With the turn of the night  
And I wrote in that log book  
All lights burning bright

We had all lights burning bright  
All lights burning bright  
All lights burning bright  
All lights burning bright
